*Here is what you will find in the Commercial Version of ACD/ChemSketch:*

Search By Structure option

Conduct searches for chemical structures within various document formats on your file system: Microsoft® Word and Excel; Adobe® Acrobat® PDF files generated from ACD/ChemSketch; structure related formats including ChemDraw, MDL® (Symyx®) ISIS, and SDfile; and all of the ACD/Labs database formats.

Not only can you perform exact structure searches, you can also search by substructure. Added options allow you to preview search results, open search result documents in ChemSketch as well as other applications, and store search results for later access. See how this is done in our Demo Movie, and review other ACD/ChemSketch movies at:

http://www.acdlabs.com/download/movies/mov_draw.html

The searchable formats include:

· **SK2**, **MOL**, **SDF**, **SKC**, **CHM**, **CDX**, **RXN**, **PDF (Adobe Acrobat)**, **DOC (Microsoft Word)**, **and XLS (Microsoft Excel)**.
· Searchable formats for ACD/Labs databases: **CUD**, **HUD**, **CFD**, **NDB**, **ND5**, and **INT**.
· Microsoft Word documents with structures created in ChemDraw or MDL ISIS can also be retrieved.

Additional features available in the commercial version of ACD/ChemSketch:

· ACD/Labs Extension for ChemDraw
· ACD/Dictionary
· SDfile Viewer
· ACD/ChemCoder
· Technical support
