

August 12, 2002

Dear Customer,

MosChip (ex-NetMos) provides drivers that autoconfigure for the product being installed. You will find that all NM98xx and 97xx products have the same driver for each of the operating systems that you may use.

The list of drivers follows:

DOS: NmDosIn.exe  
Linux: netmoscong-0.9.5\_RC3.tar.gz  
Win 95: NetMosWin95Drivers.zip  
Win 98: NetMosWin98Drivers.zip  
Win ME: NetMosWinMEDrivers.zip  
Win NT: NetMosWinNTMultiIODrivers.exe  
Win 2000: NetMosWin2000Drivers.zip  
Win XP: NetMosWinXPDrivers.zip

Under Linux and Windows NT you can force the Operating system to recognize only the Serial ports or only the Parallel ports of a Multi-port chip by using the following drivers:

Linux: Linux\_p.txt for parallel only  
Linux: Linux\_s.txt for serial only  
Win NT: NetMosWinNTParPortDrivers.exe for parallel only  
Win NT: NetMosWinNTSerPortDrivers.exe for serial only

In addition, we provide diagnostic programs for Windows NT, 2000 and XP. This program is: NetMosPCIDiagnostics.exe

Should you have any doubts as to which driver to use please do not hesitate to contact us at: [support@moschip.com](mailto:support@moschip.com).

Best regards,

Customer Support
