

Quickoffice® for iPad File Manager

File management

Simple file operations

Quickoffice® for the iPad makes file management easy by leveraging all the benefits of the touch interface and the iPad's large screen. Tap and hold on a file name to begin drag and drop. Multiple files can be selected by tapping on additional files without releasing your finger from the first file.

Move and copy files by dragging them into another directory or cloud account. The folder will open automatically under your finger after a short delay.

Note: When dragging files within one storage repository, the files will be moved. When you drag files inbetween different storage repositories, the files will be copied.

File Info View

Information and details about a file can be found by tapping on the blue chevron  to the right of the file. You can also rename the file in the File Info View.

Here you can read file info and rename it if needed.

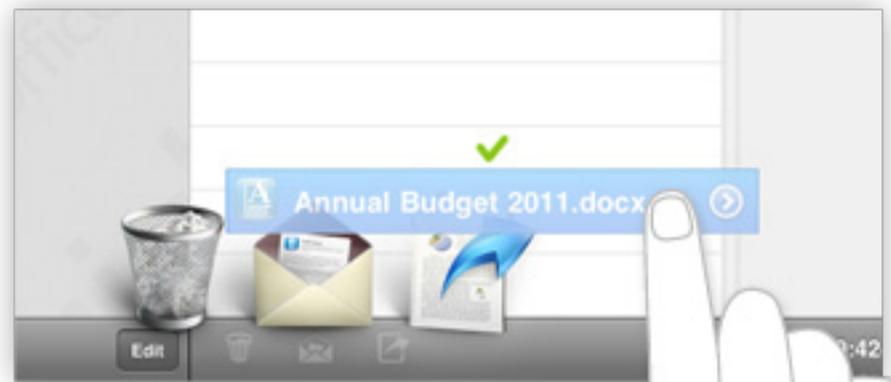

Creating new folders & files

Create new folders by pressing  on the toolbar. Quickoffice® for iPad allows you to create several different types of files.

Delete, email & share

To delete, email or share files, drop them onto the corresponding icon on the bottom toolbar.

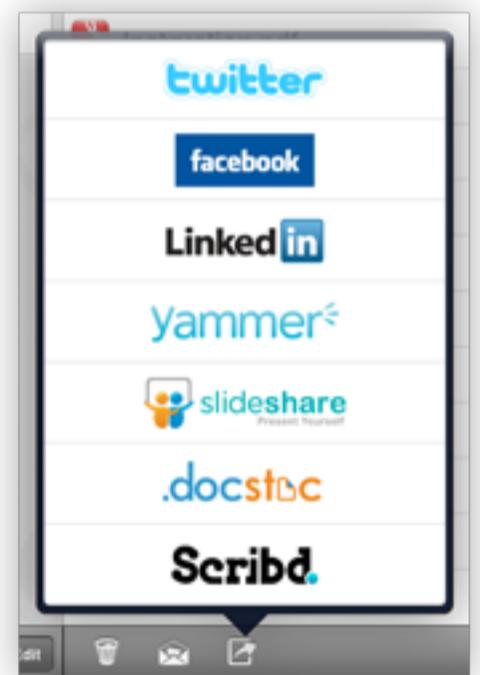

Share files

Share your files with others by dropping them onto this icon on the bottom toolbar.

Quickoffice® for iPad has partnered with industry leaders and well-known services for you to choose from.

After selecting a partner, follow the easy steps to upload and share your files for others to see.

A screenshot of the Slideshare sign-in form. The form has a header with the Slideshare logo and the tagline "Present Yourself". Below the header is the text "Enter Your Account Information". There are two input fields: "USERNAME" and "PASSWORD". Below the "PASSWORD" field is a green "Sign in" button. To the right of the "Sign in" button is a link that says "Forgot your password?".A screenshot of the Slideshare upload form. The form has a header with the Slideshare logo and the tagline "Present Yourself". Below the header is the text "Comments". There is a text area for comments with the placeholder text "Please see my documents!". Below the text area is the text "Enter any comments for your file here. This will be included with the link to your post." There are two buttons: "Get Notified" with a toggle switch set to "OFF", and a blue "Upload" button. Below the buttons is a field for the file name, which contains "Contract 248-64.docx".

Email files

Emailing your files from within Quickoffice® is easy. Simply drag the desired files onto the email icon and fill in the necessary fields.

Navigation Back and Forward

Quickoffice® for iPad's Connected File Manager stores the history of directories as you navigate from one directory to another, up to 5 locations. You can quickly switch between locations that you have visited by tapping  .

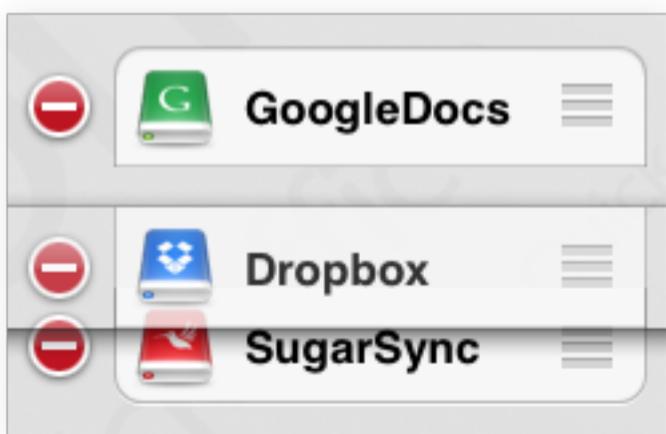

Remote storage services

Remote File Storage

Quickoffice® for iPad's Connected File Manager includes cloud integration that allows you to Access, View, Edit, Save and Share files from your favorite cloud storage services. It has a variety of remote storage partners that you can access directly within the Connected File Manager.

To access a remote storage you need to sign in to each desired service by providing the required information.

After sign-in, each service will be available under the local directory in the left pane. You can sort, rename or remove partners from your list by tapping the **Edit** button.

All file operations are available for remote storage services to make your file management experience smooth and easy.

Upload files

There are several ways to transfer your files into Quickoffice® for iPad. While you can always use remote storage accounts to store and access your files, it is possible to transfer your files directly into the Quickoffice® application.

Wi-Fi File Transfer

When your iPad is connected to WiFi network, there is an address shown on the bottom toolbar. Type this address into a web browser running on another device or computer in the same WiFi network to upload or download your files.

It's also possible to mount Quickoffice® for iPad as a network storage location on your Operating System.

iTunes USB File Transfer

iTunes provides you another way of getting files from your computer into Quickoffice® for iPad local file storage. With the iPad connected to your computer by a USB cable, navigate to the “Apps” section of the Device tab. Scroll down if needed. Drag-and-Drop or Add files to make it appear in Quickoffice® on your device.

Search

You can locate files in the local drive, Google Docs, Box.net, Dropbox.com or Evernote cloud accounts by searching for a file name in the file manager. All results will be displayed in a single pane and grouped by storage account. It is also possible to filter these results.
