### Details

Most of today's consumer-level flatbed scanners are designed to scan A4 and letter-sized paper -- bigger sizes just can't be done. But with **ArcSoft Scan-n-Stitch Deluxe**, users can finally digitize bigger items such as legal documents, scrapbook pages, artwork, newspapers, magazine spreads and more. Best of all, the results are totally seamless.

With the click of a button, **ArcSoft Scan-n-Stitch Deluxe** automatically rotates, aligns, and stitches multiple sections of a page into a single, seamless image file giving you an exact digital copy of your paper original.

#### Digitize a long document in 3 easy steps:

1. Scan the page in multiple sections (scanning instructions included)
2. Click the Stitch button
3. Preview and save the page as a seamless digital image file (JPG, BMP, TIF)

#### ArcSoft Scan-n-Stitch Deluxe includes three convenient editing and enhancement options:

- Crop Page Adjust size and shape
- Straighten Page Simple slider control
- Auto Enhance Fix contrast and color with one click
