Scan Large items

Most of today's consumer-level flatbed scanners are designed to scan A4 and letter-sized paper -- bigger sizes just can't be done. But with ArcSoft Scan-n-Stitch Deluxe, users can finally digitize bigger items such as legal documents, scrapbook pages, artwork, newspapers, magazine spreads and more. Best of all, the results are totally seamless.

Stitching into a Single

With the click of a button, ArcSoft Scan-n-Stitch Deluxe automatically rotates, aligns, and stitches multiple sections of a page into a single, seamless image file giving you an exact digital copy of your paper original.

Digitize in 3 Steps

Digitize a long document in 3 easy steps: scan the page in multiple sections (scanning instructions included); click the Stitch button; preview and save the page as a seamless digital image file (JPG, BMP, TIF). Done, it is easy and fast.

Rich Photo Editing Tools

ArcSoft Scan-n-Stitch Deluxe features an array of convenient editing and enhancement options, such as cropping page to adjust size and shape, straighten Page with simple slider control, and auto enhance fix contrast and color with one click.
