

Read Me

Clicking on the EViews **Help** menu and selecting **EViews Help Topics** displays help system links offering quick access to frequently used portions of the system.

Selecting the **Help/Quick Help Reference** entry in the main EViews menu offers additional help system shortcuts. For example, a description of “What’s New in EViews 8” may be found in the EViews **Help** menu under **Quick Help Reference**.

For the latest information on EViews 8, including possible software updates, please visit our web site at:

<http://www.eviews.com>.

We also recommend that you visit the EViews Forum:

<http://forums.eviews.com>.

where you can find answers to common questions about installing, using, and getting the most out of EViews. The Forum is an ideal place to ask questions of and share information with other EViews users.

Errata and Updated Docs

The following contains a detailed list of errata and updated documentation for each manual, organized by chapter:

- [“Getting Started” on page 3.](#)
- [“User’s Guide I” on page 3.](#)
- [“User’s Guide II” on page 3.](#)
- [“Command and Programming Reference” on page 4.](#)
- [“Object Reference” on page 4.](#)

Some formatting and minor grammatical fixes are not included in this list. Changes in the documentation that reflect either notable additions to the printed documentation or changes in program behavior are labeled “(+).” Note that page numbers for the errata entry correspond to the page numbers in the printed version of the manuals.

These errata and updates are current as of March 4, 2013.

We will make changes in source documents to correct errors in the EViews manuals and help system as errors are found. As a result, these changes will be reflected in the current versions of both the EViews help system and in the PDF files provided with current shipping versions of the program.

Note that the changes listed here may or may not be present in the versions of EViews help and the PDF files that are currently on your system. The latest versions of these files may be downloaded from our website: <http://www.eviews.com>. You may compare the dates of the files on our website with those on your local system to see whether or not you have the latest versions by selecting **Help/About EViews** from the main EViews menu.

Getting Started

[none]

User’s Guide I

[none]

User’s Guide II

[none]

Command and Programming Reference

[none]

Object Reference

Chapter 1. Object View and Procedure Reference

Equation

(p. 129) Example in the [qrsymm](#) entry should read “vector(4) v1” instead of “vector v1(10)” (2013-03-04).

Group

(p. 299) Clarify the syntax for specification of the [resample](#) proc *output_spec* and “suffix = ” option (2013-03-04).

Series

(p. 517) Clarify the syntax for specification of the [resample](#) proc *output_spec* and “suffix = ” option (2013-03-04).
